

About AlarmNet 360™

AlarmNet 360 is the next generation of AlarmNet® Direct. It is a cloud management platform that dramatically streamlines and simplifies the way you do business, from account setup and control panel programming* to registering radios, enabling Honeywell Total Connect® Remote Services and identifying great new revenue opportunities. It works on computers, tablets or smartphones—and enables programming remotely at the office, onsite or a combination of both.

AlarmNet 360 has a modern, clean look and feel with a “tour” that will guide you through the process. It is maintenance free—there are no servers to maintain and no software versions to download, as updates are provided automatically.

Take advantage of our Reports Dashboard which provides useful business intelligence data for business owners, executives and managers that can help grow your customer base and reduce attrition.

AlarmNet 360 delivers numerous benefits:

- Cloud hosted access means no software to load or maintain
- Simple graphical user interface (GUI) makes installations easier
- Pre-programmed templates help make programming effortless and virtually error-free
- The Reports Dashboard drives additional sales and RMR
- System programming can be done from the office or anywhere, locally onsite or a combination of both—you decide!
- Program communicators, services, the Lyric™ Controller and LYNX Touch 5200, 5210, 7000 control panels and peripherals on one simple platform
- Anywhere, anytime system management
- For the Lyric Controller and LYNX Touch 5200, 5210, 7000 Home and Business Control Systems:
 - Remotely program control panels and peripherals
 - Pre-program systems in advance
 - The complete solution for installations anytime, anywhere on any PC or smart device
 - Remotely view security system status of control panel, sensors and communicators
