

I. Navigation

AlarmNet 360 offers a modern look and feel with added functionality and ease of use.

The Navigation Bar makes it easy to configure and check the status of devices, receive a new PIN number if you are replacing a communicator on an existing account and receive 2G sunset information. The main menu provides doorways into your devices, accounts, company information, the reports dashboard and more.

- Devices
- Accounts

- Template
- Account Center
- API Documents
- Logout

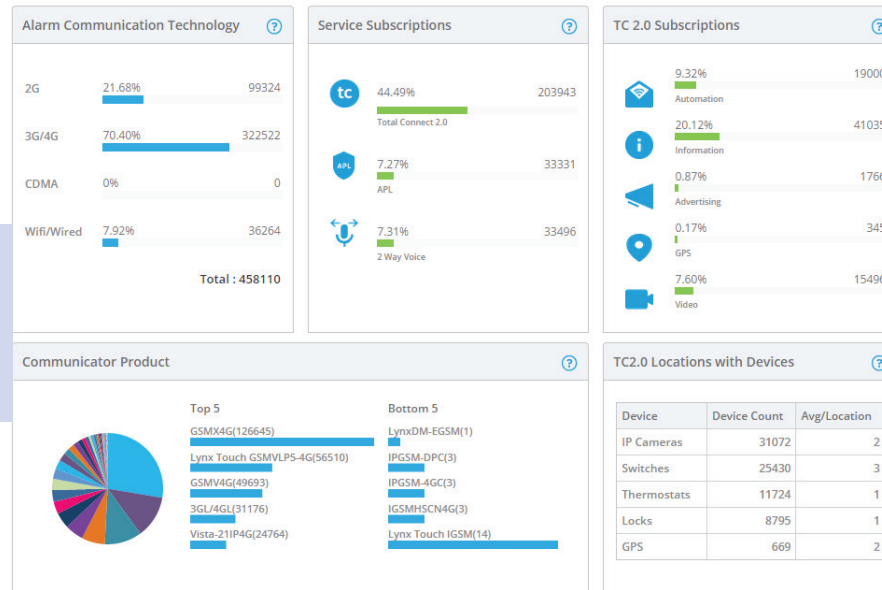

II. Getting Started

Simply click on “Device Programming” and then on “Program/Replace Device.”

- Select the Lyric™ Controller or LYNX Touch 52XX/7000 to program new accounts and control panels, enable Honeywell Total Connect® 2.0 and enroll and program AlarmNet communicators and peripherals for these systems.
- Select “Other Devices” to program communicators for VISTA™, LYNX Plus and other LYNX Touch systems.
- To view all of your programmed devices, simply click the “Device Programming” menu item, enter your city code and central station ID, click the “Search” button and all of your programmed devices will appear.

IV. For More Assistance

- For additional information or help getting started, consult the following resources
- “Take a Tour” of AlarmNet 360 with tips that help you navigate the website
- Visit MyWebTech at <https://mywebtech.honeywell.com/>
- Contact AlarmNet Customer Service at (800) 222-6525 or your local District Manager

III. Interactive Reports Dashboard

- To access the Interactive Reports Dashboard, click on the menu bar on the top left (three bars), select “Reports” and then click on “My Dashboard”
- You can receive custom reports indicating which services your customers are using—by individual account or for all of your accounts, including:
 - Alarm Communication Technology
 - Service Subscriptions
 - Honeywell Total Connect 2.0 Subscriptions
 - Communicators by Type
 - Honeywell Total Connect 2.0 Locations with Devices
- Use this purchase information to identify additional sales opportunities and create targeted value-added offerings, such as 2G upgrades, offering a Honeywell Z-Wave® thermostat as an add-on for users that already have Z-Wave lights or locks, and adding a cellular communicator to customers using Wi-Fi® only
