

AT&T 3G Sunset: February 2022

Attention: USA customers

AT&T Sunset

AT&T plans to end service on its 3G wireless networks in February 2022. Any existing 3G/4G communicators that are currently registered are expected to communicate and be supported by AlarmNet through February 2022 under Resideo's agreement with AT&T. If you cancel a registered/billable 3G/4G account on or after June 26, 2019, you cannot reactivate the 3G/4G communicator.

LTE radio portfolio

Resideo has expanded its communicator portfolio to include LTE radios, which provides a transition to new cellular technology, and offers maximum network longevity. [Click here](#) to read our LTE data sheet.
