

Verizon 3G Sunset: December 31, 2022

Attention: USA customers

Verizon Sunset

Verizon plans to end service on its CDMA wireless networks on December 31, 2022. Any existing CDMA communicators that are currently registered will continue to communicate and be supported by AlarmNet as Verizon has extended its CDMA network to Resideo through December 31, 2022. If you cancel a registered/billable CDMA/3G/4G account, you cannot reactivate that communicator.

LTE radio portfolio

Resideo has expanded its communicator portfolio to include LTE radios, which provides a transition to new cellular technology, and offers maximum network longevity. [Click here](#) to read our LTE family data sheet.
